1 PREPARATION

Unpacking Your P-touch Labeler

Check that the package contains the following before unpacking your P-touch labeler.

- PT-80 P-touch labeler
- 1 tape cassette
- 1 scissor
- 1 adhesive tape
- 1 label guide

Power Supply & Tape Cassettes

- The power supply is 12VDC, 150mA output.
- The tape cassette system uses 9VDC. You can set the power supply to match the cassette system and the power supply to match the cassette system.

In case of general precautions:

- Do not use any tape that is not made for the P-touch labeler.
- Do not touch the print head mechanism. Use a soft, dry cloth when cleaning the tape cassette.
- To avoid injuries, do not touch the cutter's edge.
- Do not get the machine wet, such as by handling the machine with wet hands or spilling beverages onto the machine.
- Avoid using the machine in extremely dusty places.
- To avoid injuries, do not touch the cutter's edge.
- The machine does not work if the battery is not fully charged or if the battery has been fully charged.
- The machine does not function properly if there is a part of the tape that has been damaged.
- Do not get the machine wet. Use it in dry places and avoid spilling onto the machine.
- Do not touch the cutter's edge.
- The setting has cleared.
