Symbols and special characters

International characters

You can create international characters by combining a letter and a diacritical (accent). Diacriticals available on the keyboard are ` " and ^. To add a diacritical to a character, enter the character first, followed immediately by the diacritical. For example, press 'E' followed by '" to get é.

To add a diacritical to an existing character, use < or > to place the cursor under the character to be changed, then press the appropriate diacritical key.

Symbols

Pressing (SYM) changes the display to show symbols and special characters, some of which are not available direct from the keyboard. The display will show:

q-o? (or **q-r?** where available).

Each letter selects a line of five symbol characters, as shown in the table below. Note that some of the more complex printed symbols are represented by simpler symbols in the display. Press (DEL) to cancel or press the letter key required.

Use or to select a symbol. Press (SYM) again to place the symbol in the label, or press (min) to place it and print the label.

Introduction

The Dymo 1000 Electronic Labelmaker enables you to create a wide variety of high quality self-adhesive labels of up to 100 characters.

The Labelmaker uses 12mm (1/2") wide tape cassettes in a number of label colours.

Normal or double width, full and half-height text can be printed in a single line, or in half-height on two lines.

Text can be set horizontally or > 0 - + - 0 = > and is always centred on the label.

Function keys

ON/OFF ••

Switches the power on and off.

· Switches off automatically after three minutes if no kevs are pressed. The last label created will be stored and displayed when next turned on.

Note: If the batteries are removed for more than a few seconds, or the external power supply interrupted. all text and settings will be lost. When power is restored, the display will show a flashing cursor (no text) and the settings will be fullheight, normal width, auto length. \triangle and (CAPS) off.

CAPITALS (CAPS)

- · Press for all subsequent characters in UPPER CASE (CAPITALS), as confirmed by the indicator in the top left corner of the display.
- Press again to cancel and return to lower case.

SHIFT KEY (A)

- Press and release (Δ) before pressing an alphabet key to produce an UPPER CASE character, as confirmed by the indicator in the lower left corner of the display.
- For dual purpose keys, press Δ first to produce the legend above the key.
- Pressing while (CAPS) is set. will give lower case characters.

DELETE (DEL)

· Press to delete the character to the left of the cursor, or to cancel certain function key operations.

 Press to clear all the text and the length setting, but leave the print size and style settings unchanged.

CURSOR KEYS <

These kevs move the cursor along the text.

- Pressing \triangle + \triangleleft or \triangle + \triangleright moves the cursor to the beginning or end of the text. When used in conjunction with certain function kevs. use ≪ or > to select options and numerical values.
- · To insert characters into the text. use < or > to position the cursor under the character to the right of the insertion point, then type in the characters required.

PRINTING (PRINTING

- Press (PRINT) to print the label.
- · Press the cutter button to release the label.

SPACE KEY (

 Press to insert a space into the text.

FEED $\triangle + A$

 Press to feed out 25mm of tape without printing.

SYMBOLS (SYM)

· Press to select a symbol character - see 'Symbols and special characters'.

TEXT SIZE (SIZE)

 Press to display the symbols representing the four text print

normal height and width normal height, double width half-height, normal width half-height, double width.

The cursor will be positioned over the current selection.

Press (DEL) to cancel, or use or to move the cursor over the size symbol required, then press (SIZE) to confirm the

selection, or (PRINT) to fix the new size and print the label.

TWO-LINE TEXT (A) + (CAPS)

Labels comprising two lines of text can be printed on the 12mm (1/2") wide labels.

· Press to insert the special character $\begin{picture}(60,0) \put(0,0){\line(0,0){100}} \put(0,0){\line$ you want the text to break, eg: This label has two line text. on the display will print as:

This label has two line text.

Only one Can be included in a label at a time.

 Press (DEL) to delete
 , as for normal text characters.

Note: Two lines cannot be printed vertically.

VERTICAL TEXT (A) + (SYM)

- Rotates the text through 90° so that the label is printed > 0 - + .- 0 a - - > , as confirmed by the indicator in the top right of the display.
- Press again to cancel and return to horizontal text.

LABEL LENGTH (A) + (SIZE)

Displays the current label length. The length is normally calculated automatically, according to the length of the text on the label.

- Press (DEL) to cancel the length function without changing the length, or:
- use ≪ or > to increase (up to 400mm or 15" max.) or _ decrease the length in 5mm (1/5") steps. The display will flash if you try to make the label shorter than the text.
- If the length displayed is preceded by the > symbol, the length has already been fixed; the label is too short for the text and it will not print. Either press > to increase the length in 5mm (1/5") steps until the > symbol disappears, or press
- \triangle + \bigcirc to cancel fixed length: the label is now long enough for the text and can be printed.
- Press Δ + (SIZE) again to fix the length for all subsequent labels as indicated in the lower right corper of the display, or
- press (PRINT) to fix the new
- length and print the label.

 Pressing \(\tilde{\Delta} + \(\tilde{\Delta} \) will cancel the fixed length and restore the automatic length.

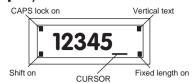

INCREMENTAL PRINTING

Prints a label then increments the last digit of any number in the label by 1, ready for the next print command.

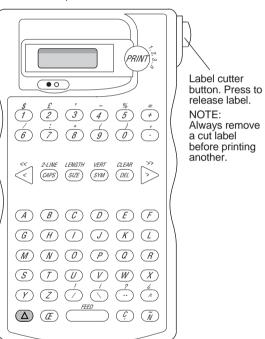

• Press (PRINT) to print the next label, or \triangle + PRINT to print the next label and increment again bv 1.

The Display

The display shows:

- Up to five text characters, plus the cursor, at one time. Use < or > to move along the text.
- Four indicators, one in each corner as shown
- The display will flash if you press an incorrect key in a function sequence.

Creating your first label

- Fit batteries or connect the AC adaptor, and insert a tape cassette.
- Press (• o) to switch on.
- Type in your text using the alphabet keys; each character will appear in the display. If you make a mistake, press (DEL) to delete the error, then type in the correction.
- Press (PRINT) to print the label, then press the cutter button to release the label.
