

Introduction

The Dymo Pocket Electronic Labelmaker enables you to create a wide variety of high quality self-adhesive labels of up to 100 characters. The Labelmaker uses 9mm ($\frac{3}{8}$ ") or 12mm ($\frac{1}{2}$ ") wide tape cassettes in a number of label colours.

Condensed, normal or extended text can be printed horizontally or vertically and is always centred on the label.

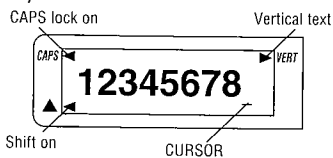

Power Supply

- Pull back catch **A** then lift and remove battery compartment cover **A** – see page 2.
- Insert six size AAA alkaline or re-chargeable nickel-cadmium batteries, observing the polarity markings **A**, and refit cover.
- Remove batteries if the Labelmaker is to be unused for some time.

Changing the cassette

- Slide catch **B** to the right to open cassette door **B** – see page 2.
- Hold as shown, then lift cassette **B** straight up and out.
- Ensure tape and ribbon **B** are taut across mouth of cassette and tape passes between guide posts before installing as shown. If necessary, turn spool **B** clockwise to tighten ribbon.
- Insert cassette and push **firmly C** until it **clicks** into place.
- Ensure tape and ribbon are positioned as shown between pinch roller **C** and print head **C**.

The Display

The display shows:

- Up to eight text characters, plus the cursor, at one time. Use **←** or **→** to move along the text.
- Three indicators – as shown above.
- The display will flash if you press an incorrect key in a function sequence.

Function keys

ON/OFF **⏻**

Switches the power on and off.

- Switches off automatically after two minutes if no keys are pressed. The last label created will be stored and displayed when next turned on.

Note: If the batteries are removed for more than a few seconds, all text and settings will be lost. When power is restored, the display will show a flashing cursor (no text) and the settings will be normal text with **▲**, **VERT** and **CAPS** off.

CAPITALS **CAPS**

- Press for all subsequent characters in UPPER CASE (CAPITALS), as confirmed by the **CAPS** indicator in the top left corner of the display.
- Press again to cancel and return to lower case.

SHIFT KEY **▲**

- Press and release **▲** before pressing an alphabet key to produce an UPPER CASE (CAPS) character, as confirmed by the **▲** indicator in the lower left corner of the display.
- For dual purpose keys, press **▲** first to produce the legend above the key.
- Pressing **▲** while **CAPS** is set will give lower case characters.

DELETE **DEL**

- Press to delete the character to the left of the cursor, or to cancel certain function key operations.

CLEAR TEXT **▲** + **CLEAR** / **DEL**

- Press to clear all the text, but leave the text size and style settings unchanged.

CURSOR KEYS **←** or **→**

- Press to move the cursor along the text, one character at a time.
- Press and hold to scan quickly through the text.
- When used in conjunction with certain function keys, use **←** or **→** to select options.
- To insert characters into the text, use **←** or **→** to position the cursor under the character to the right of the insertion point, then type in the characters required.

GB

PRINTING

- Press  to print the label.
- Press the cutter button **E** to release the label – see page 2.

SPACE KEY

- Press  to insert a space into the text.

SYMBOLS +

- Press to select a symbol character – see SYMBOLS table, page 2.

TEXT SIZE +

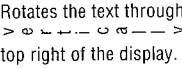

- Press to display the symbols for the three text print sizes:

- condensed
- normal
- extended

The cursor will be positioned over the current selection.

- Press  to cancel, or use  or  to move the cursor over the size symbol required, then press  +  to confirm the selection, or  to fix the new size and print the label.

VERTICAL TEXT +

- Rotates the text through 90° so that the label is printed , as confirmed by the **VERT** indicator in the top right of the display.
- Press again to cancel and return to horizontal text.

Symbols and special characters

International characters

To add a diacritical (accent) to create an international character, enter the character first, followed immediately by the diacritical, e.g. press  followed by  to get **é**.

To add a diacritical to an existing character, use  or  to place the cursor under the character to be changed, then press the appropriate diacritical key.

Symbols

Press  +  to show symbols and special characters, some of which are not available direct from the keyboard. The display will show: **a-q?**

Each letter selects a line of eight symbol characters, as shown in the table on page 2.

Press  to cancel or press the letter key required.

Use  or  to select a symbol. Press  again to place the symbol in the label, or press  to place it and print the label.

Print contrast — may be adjusted by pressing  +  followed by  to display five contrast symbols . Use  or  to select lighter or darker print. Press  +  again to confirm the setting. The contrast level will revert to the mid-setting when the Labelmaker is turned off and on again.

Cleaning

- Clean the cutter blade regularly: Remove the cassette, then use a ball pen or pencil to hold down interlock pin **D** – see page 2.
- Press and hold in cutter button **D** to expose blade **D**.
- Release interlock pin **D**, then use a cotton bud and alcohol to clean both sides of cutter blade **D**. Release cutter button **D**.
- Check and clean print head face **D** regularly using cotton bud and alcohol ONLY.

Troubleshooting

No display

- check machine is on
- replace discharged batteries.

No printing or poor text

- replace discharged batteries
- check tape cassette installed correctly
- replace the tape cassette.

No response to print key

- **!!!!!!** in the display indicates a printer jam. Press any key to return to normal display. Open the cassette compartment and free the jam.
-  flashing in the display indicates discharged batteries. Press any key to return to normal display. Replace batteries.
